

# A Practicum for Biomedical Technology & Management Issues

## Table of Contents

| Chapters                                                                                 | Authors                                                                  | Chapters                                                      | Authors                                                 |
|------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|---------------------------------------------------------------|---------------------------------------------------------|
| <b>Management</b>                                                                        |                                                                          | <b>Technology</b>                                             |                                                         |
| 1. A Brief History of Clinical Engineering and Biomedical Equipment Technology           | <i>Tom O'Dea, Ph.D., PE, CCE, SASHE</i>                                  | 30. Biomedical Engineering in the Perioperative Environment.  | <i>George Panyarachun, MS</i>                           |
| 2. Establishing an In-House Biomedical Program (Business Planning & Execution)           | <i>Myron D. Hartman, MS, SASHE, CCE, CRES, CBET</i>                      | 31. Laboratory Equipment                                      | <i>Dave Harrington, Ph.D.</i>                           |
| 3. Quality Assurance (QA)                                                                | <i>Arif Subhan, MS, CCE</i>                                              | 32. Introduction to Imaging Devices                           | <i>Dave Harrington, Ph.D.</i>                           |
| 4. The Joint Commission                                                                  | <i>Arif Subhan, MS, CCE</i>                                              | 33. Critical Care / Intensive Care Units                      | <i>Dave Harrington, Ph.D.</i>                           |
| 5. Managing Medical Device Safety                                                        | <i>James P. Keller, Jr., M.S.</i>                                        | 34. Introduction to Cardiac Physiology and Cardiac Devices    | <i>Dave Harrington, Ph.D.</i>                           |
| 6. Conducting Medical Device Evaluations                                                 | <i>James P. Keller, Jr., M.S.</i>                                        | 35. Telehealth: I Can See the Highway, But Where Is the Ramp? | <i>Yadin David, Ed.D., P.E., CCE, FAIMBE</i>            |
| 7. Theory and Practice of Device Incident Investigation                                  | <i>Bruce Hyndman, MSBE, PE &amp; Marvin Shepherd, PE (Safety), FACCE</i> | 36. Introduction to DICOM                                     | <i>Jeff Kabachinski, MCNE, MS-T</i>                     |
| 8. HIPAA and Medical Device Security                                                     | <i>Stephen L. Grimes, FACCE &amp; Matthew F. Baretich, Ph.D., PE</i>     | 37. Introduction to PACS                                      | <i>36. Gregory Herr, BSEE, MBA, CCE</i>                 |
| 9. Use Errors- The Benefits and Challenges of In-service Education                       | <i>William A. Hyman, ScD, PE</i>                                         | 38. An Introduction to RFID                                   | <i>Jeff Kabachinski, MCNE, MS-T</i>                     |
| 10. Failure Mode and Effects Analysis: And its application to the use of medical devices | <i>Malcolm Ridgway, Ph.D., CCE</i>                                       | <b>Reference</b>                                              |                                                         |
| 11. Computerized Maintenance Management Systems                                          | <i>Ted Cohen, MS, CCE</i>                                                | 39. Electrical Safety, Codes & Standards                      | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 12. Human Factors Engineering                                                            | <i>Frank R. Painter, MS, CCE</i>                                         | 40. Anesthesia & Respiratory Care                             | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 13. Medical Equipment Replacement: Planning, Factors, Methods and Outcomes               | <i>Tobey Clark, MSEE, CCE, &amp; Raymond D. Forsell, CCE</i>             | 41. Cardiac Physiology                                        | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 14. Evidence-based Medical Equipment Maintenance Management                              | <i>Binseng Wang, ScD, CCE, FACCE, FAIMBE</i>                             | 42. Defibrillators                                            | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 15. Benchmarking Clinical Engineering                                                    | <i>Myron D. Hartman, MS, SASHE, CCE, CRES, CBET</i>                      | 43. Electro-Surgical Devices                                  | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 16. Should You be Deposed – What to Expect                                               | <i>Jerome T. Anderson, CBET, CCE</i>                                     | 44. Infusion Devices                                          | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 17. Project Management                                                                   | <i>Leslie R. Atles, CCE, CBET</i>                                        | 45. Power Distribution                                        | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 18. Healthcare Facility Management                                                       | <i>Matthew F. Baretich, Ph.D., PE</i>                                    | 46. Lasers                                                    | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 19. Wireless Spectrum Management                                                         | <i>Terry Clemans, MBA, CCE, CBET</i>                                     | 47. Ultrasound                                                | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 20. Customer Service                                                                     | <i>Malcolm Ridgway, Ph.D., CCE</i>                                       | 48. Diodes, Rectifiers and Thyristors                         | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 21. Customer Satisfaction: A Key Metric for Biomedical and Clinical Engineering          | <i>Leslie R. Atles, CCE, CBET</i>                                        | 49. Chemistry                                                 | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 22. Infection Control and the Clinical Engineer                                          | <i>Duane Mariotti, BSEE</i>                                              | 50. Computer Networks                                         | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 23. Emergency Preparedness Plan: The Role of Clinical Engineers and BMETs                | <i>Yadin David, Ed.D., P.E., CCE, FAIMBE</i>                             | 51. Operational Amplifiers                                    | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 24. Collaboration Between Clinical Engineering and Information Technology Professionals  | <i>Izabella A. Gieras, MS, MBA, CSSBB, CCE</i>                           | 52. Digital Electronics                                       | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 25. The Management of Personnel                                                          | <i>Patrick K. Lynch, MBA, CCE, CBET</i>                                  | 53. Electrical Circuits                                       | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 26. Education, Mapping a Course for Career Advancement                                   | <i>Barbara Christie</i>                                                  | 54. Transistor Devices & Circuits                             | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 27. Gaining Respect Within Your Organization                                             | <i>Paul W. Kelley, CBET</i>                                              | 55. Conversion Tables                                         | <i>Affinity Reference Guide, Atles &amp; Segalewitz</i> |
| 28. Distance Education and the Talking Head                                              | <i>Manny Roman,</i>                                                      | Index of Terms                                                |                                                         |
| 29. The Role of Professional Organizations in Biomedical & Clinical Engineering          | <i>Leslie R. Atles, CCE, CBET</i>                                        |                                                               |                                                         |
