

# Are your students getting the most out of your integrated assessment technology?

By using this groundbreaking technology, you can create a multitude of diverse question types accessible on all devices. **Kendall Hunt** can accelerate product development using powerful, polished, and reusable assessment components that allow authors like you the ability to pair / integrate their current or new text with your existing LMS system.

## How We Can Help You!

- 1 **Ask better questions with our technology-enhanced items**
- 2 **Time-saving authoring interface made for instructors**
- 3 **Teach through assessment**
- 4 **Fast, automatic STEM scoring**
- 5 **Track learner progress**
- 6 **Is Proven! The platform includes 164 million customized questions authored by instructors with a 99.97% online availability.**

A cell phone company is conducting an online survey of randomly selected respondents to determine how often they use their personal cell phone to conduct business calls. So far, more than 1,000 people have responded to the survey. The frequency distribution below shows the results to date. What is the probability that the next person surveyed either rarely or never uses their personal cell phone to conduct business calls?

Response	Number of Respondents
Always	186
Often	305
Sometimes	409
Rarely	112
Never	128
