Mymathtrailblazers.com site for Math Trailblazers users

Kendall/Hunt Publishing launches new user support site for Math Trailblazers

DUBUQUE, IA. – Mymathtrailblazers.com represents a new level of resources for educators and families of *Math Trailblazers* students.

Math Trailblazers is a complete, research-based, National Science Foundation (NSF)-funded K-5 mathematics program integrating math, science and language arts.

The new site includes information for administrators, teachers as well as families.

For educators, there are videos that provide lesson modeling and how mathematical topics are addressed in *Math Trailblazers*. There is also specific grade-level information, including printable individual Daily Practice and Problem sheets.

A new message board to help teachers and administrators share ideas is also available.

For administrators, the site includes information for supporting teachers as well as ideas for communicating with families, including setting up family nights.

Families accessing the site can take advantage of the homework help section, which includes easy-to-understand explanations on how to best help your child with specific homework.

Access to the site is provided through Kendall/Hunt. Families should contact their child's teacher or administrator if they have not yet been notified about the site.

For more information, contact 800-542-6657 to talk to a Kendall/Hunt representative nearest you.
